

Drylac[®]
Powder Coatings

Meet the Color Muse

TIGER Drylac[®] offers the Color Muse: a color reader and customized mobile app used to scan the color of any surface, and match the color to TIGER Drylac powder coating products.

TIGER Color Muse App

TIGER's Color Muse app integrates the device's color sensing technology, providing a seamless color communication tool for professional powder coaters, specifiers, painters, color sales representatives, graphic designers, and everyone in between.

Take the Guesswork out of Color Matching

We know your customers are demanding, so stop wasting time trying to match powder coat samples until you have taken away the guesswork. Color Muse puts precision color accuracy directly into your smart phone app.

Available to order directly from TIGER Drylac[®]. Contact us today to see how you can place an order on your account for a TIGER Color Muse.

Compatibility	iOS 11 or later. Android 8.0 or later

Color Muse

Getting Started

1. Download the TIGER Variable Inc App.
 - You can find it on the App Store or Google Play Store.
2. Launch the app.
 - Launch app and select an account option: Create, Login, or Skip.
3. Connect to Color Muse®.
 - In the TIGER Color Muse® App, tap “connect device”.
 - Press wake button on Color Muse® to wake (LED indicator will flash).
 - The LED indicator will flash quickly once your smart-device finds Color Muse® (<5
- sec). Press the button again to confirm the connection.
 - Tap “Calibrate”
 - Twist and remove the calibration cap to reveal the sensor, screw the cap on the opposite end for safekeeping.
4. Scan colors.
 - Place the TIGER Color Muse® against any surface and press “scan” in the app.
 - The scanned color will appear (screen display color may not be accurate). Matching results will be displayed with top result listed first, second closest match second, etc.
