

NEW 09/74425

Zinc-Free Flex Cure Primer

TIGER Drylac® has developed an epoxy/polyester hybrid zinc-free flex cure primer. Part of a two-coat TIGER Shield system. It provides superior corrosion protection to aluminum and steel substrates.

Key Features & Benefits

- Flexible curing cycle
- Ability to fully cure primer before applying top-coat
- Very good corrosion protection
- Very good mechanical properties
- Good chemical resistance
- Good storage stability
- Very good edge coverage

Typical Applications

- Ideal for objects of various metal wall thickness
- Large objects
- Steel/aluminium constructions
- Interior objects that only require a primer
- Agricultural machinery
- Industrial equipment
- Fixtures
- Fences
- Bike mounts

Product Details

- Packaging 22 & 44 lb (10 & 20 kg) boxes and 5 lb (2.5 kg) minipack
- Zinc-free primer
- Smooth glossy 75-85
- Consult the Product Data Sheet for more details
