# AUTOMOTIVE AFTERMARKET

TIGER Drylac® is your one-stop-shop for automotive aftermarket powder coatings. We have prepared an extensive NEW product line for Automotive Aftermarket that includes exciting colors and spectacular special effects!

TIGER Drylac powder coatings can be used around an entire vehicle, including:

- Suspension: brakes, control arms, springs, shocks
- Performance: intakes, filters, engine covers
- Trims and accessories: roof racks, running boards, bumpers, fenders, tow hooks
- Wheels: aluminum and steel wheels for aftermarket applications

TIGER Drylac® has decades of experience in the automotive aftermarket industry. After introducing the US market to the RAL color system in 1985, we have done thousands of color matches in our labs and brought new innovations in the market. At **TIGER**, our sales team is committed to supplying top quality powder coatings for your jobs.

glossy | 230/44444  
Hot Rod Blue | gloss level 90-100

## Disclaimer

The colors featured in this color card are matched as accurately as possible to color standards. Some deviations from the standards might be noticeable due to texture and gloss level of the surface finish. Gloss level on metallic, fine and rough textured swatches cannot be accurately measured. Swatches have been matched to color standards at a **45-degree visual angle under a D65 Daylight** primary source. The swatches are to be considered as an indication only. In practice, discrepancy between the color swatch and the actual powder coating may arise. This is due to paper and ink limitations, the influence of light and heat during the color card production, as well as gloss level, substrate, surface variations, binder systems and pigments, coating thickness and cure oven conditions used during application. For an accurate color and finish assessment, it is recommended to obtain a powder coated sample panel from **TIGER Drylac®**.
