#### **TIGER Drylac® Color Cards**

Additional **TIGER Drylac®** Color Cards include: 3D Metallics, RAL Colors + Textured and Smooth, Metallics & Special Effects, Kiosk Color Card, Navy, CARC<sup>1</sup>, Agriculture, Construction & Earth Moving Equipment (ACE)<sup>2</sup> and Series 29<sup>2</sup>.

#### Disclaimer

Color swatches featured in this document have been matched to color standards at a **45-degree visual angle under a D65 Daylight** primary source. RAL numbers are matched closely to the RAL Standards. Gloss level on metallic and fine textured swatches cannot be accurately measured.

Color swatches are considered as an indicator only. In practice, discrepancy between the color swatch and the actual powder coating may be present due to: paper and ink limitations, the influence of light and heat during the color swatch production, gloss level, substrate, surface variation, binder and pigment systems, coating thickness or cure oven conditions used during application. For better accuracy of color and finish, it is recommended to obtain a powder coated sample panel from **TIGER Drylac**<sup>®</sup>.

Semi transparent colors require a durable primer chemistry. Please contact **TIGER Drylac®** if using the following products in a two-coat system consisting of a primer or e-coat base coat: **TIGER Drylac® 38/90080 Brilliant Sparkle Silver** and/or **TIGER Drylac® 38/99999 Bengal Silver**.

TIGER Drylac<sup>®</sup> Super Durable products with a fine texture finish are recommended for use with a base coat primer.

## Super Durable powder coatings for exterior and interior applications

**TIGER Drylac**<sup>®</sup> features a full line of **Super Durable** high-performance powder coatings intended for architectural applications such as metal façades, steel construction, stadium seating, railings, residential window & door frames and more. **TIGER Drylac**<sup>®</sup> **Super Durable** products are also suitable for applications where extreme weather resistance is required such as agricultural & construction equipment, military (Army and Navy) equipment, communication towers, playground equipment, patio furniture and garden equipment.

## Please note the following TIGER Drylac® series include Super Durable products:

Series 38	Super Durable polyester
Series 138	Super Durable TGIC-Free polyester
Series 61	Super Durable Anodized Effect polyester TGIC-Free
Series 68	3D Metallic, Super Durable TGIC-Free polyester

## NEW - Series 138

**TIGER Drylac® Series 138** are **TGIC-Free Super Durabl**e powder coatings with "Flex Cure" a uniquely designed flexible curing technology to accommodate a quicker crosslinking of the chemistry. **Series 138** powder coatings feature reliable performance characteristics favorable to **Series 38 Super Durable** formulations.

## **TIGER Shield system**

This two-coat system consists of a corrosion protective primer as a base coat and an opaque weather resistant topcoat. It is used to achieve excellent corrosion resistance in harsh environments.

**TIGER Drylac® Dryprotector, (69/70000), Zinc-Rich Primer (69/90500 - 69/90701** in Canada only) and Zinc-Free **OGF Primer (09/73841)** are primers recommended to achieve an optimum non-porous film. For additional information on the application of the **TIGER Shield** system, refer to the latest Product Data Sheets for these primers, which can be found on the TIGER Coatings website.

## **Bureau of Land Management (BLM) Standard Environmental Colors**

The US Bureau of Land Management Standard Environmental Colors were developed by government to minimize visual contrast with background landscaping and ensure proper color selection for facilities. **TIGER Drylac® Super Durable** products in BLM colors are approved to US government standards due to their outstanding weather and UV resistance, engineered to withstand extended exposure to harsh environments.

## **3D Metallic Powder Coatings**

Until now one-coat powder coatings could not match the visual performance provided by wet effect paints. However, **TIGER Coatings** is now opening spheres previously out of reach with **3D Metallics**. The coating features a breathtaking, three-dimensional effect with stunning depth, spatial clarity and unsurpassed brightness. These effects remain visible at a considerable distance and from different perspectives.

With **TIGER Drylac® 3D Metallics**, many areas of industrial surface finishing may now draw on the 'green' technology of powder coating and move away from solvent-based wet paints.

TIGER Drylac® 3D Metallics are a Super Durable formulation. See our Series 68 Color Card for details.

## **New Product – Weathered Steel Finishes**

**TIGER Drylac®** introduces two new finishes to replicate the comforting look and tactile feel of naturally weathered steel. **Weathered Steel Ambra** pleasingly resembles orange rust on iron, while **Weathered Steel Viola** exhibits deep reds and burgundies that blossom only after oxidation has occurred over many years. These finishes are easy to maintain and will retain their original color without unsightly stains and degradation that occur with rusting iron.

Products marked with RED text: Limited stock is available, please consult the stock indicator on our Webshop or contact TIGER at

\*\* To enhance the depth of finish, TIGER Drylac<sup>®</sup> recommends the application of a clear top coat. | \*\*\* Due to semi transparency of the product, the opacity of the color and finish will depend upon the substrate type and the film thickness. A film below 2.8 mils will exhibit limited hiding.

## **TIGER Drylac® Architectural Powder Coatings**

A unique collections of powder coatings compliant with AAMA specifications for North American manufacturers and designers.

#### Features

High performance architectural powder coating featuring:

- Superior gloss and color retention
- Outstanding resistance to fading
- Outstanding resistance to chalking
- Good chemical resistance
- Good edge coverage
- Good storage stability

## **Typical Applications**

All Architectural and Construction Applications including:

- Metal Facades
  - Marine Equipment
- Curtain Walls
- Window & Door Frames
- Railings
- Light Poles

## TIGER Drylac<sup>®</sup> Series 75

Hyper Durable Powder Coatings for Architectural Aluminum Applications

**TIGER Drylac<sup>®</sup> Series 75** is a Hyper Durable powder coating offering superior weatherability for architectural aluminum applications meeting the performance requirements described within AAMA 2605-20<sup>1</sup>. AAMA 2605 is the highest performance standard for superior performance organic coatings applied to architectural products. Series 75 flouropolymer powder coatings offer an environmentally friendly alternative to liquid coatings, achieving greater than 2.5 mil of dry film in a single application. The resulting finish is a corrosion resistant, mechanically robust, protective coating providing superior resistance to chalking and color fade<sup>2</sup>.

Our products within **Series 75** are only available to **TIGER Drylac®** approved applicators for applications with an approved pretreatment on aluminum.

## TIGER Drylac<sup>®</sup> Series 38/138

Super Durable Powder Coatings for exterior and interior applications

**TIGER Drylac® Series 38** polyester TGIC super durable, and **TIGER Drylac® Series 138** TGIC-free super durable powder coatings are compliant with the American Architectural Manufacturing Association's specification AAMA 2604<sup>3</sup>, offering excellent weather and UV resistance. Based on 5-year Florida exposure, **TIGER Drylac® Series 38/138** exhibits  $\leq \Delta \epsilon$  5.0 (Hunter) color change and > 30% gloss retention. TGIC-Free chemistry is also available for global distribution as **TIGER Drylac® Series 58**. **Series 58** is fully compliant with AAMA 2604 offering the same level of performance and protection.

For more information on **Series 38/Series 138** super durable powder coatings please refer to our Super Durable color card.

For more information on **Series 58** TGIC-Free super durable powder coatings please refer to our product data sheet available on our website or consult with your **TIGER Drylac**<sup>®</sup> sales representative. **Series 58** is only available to approved architectural applicators.

<sup>2</sup>Colors lighter than RAL 7000 in hue may prematurely chalk in extreme conditions due to the limitations of white pigment titanium dioxide.

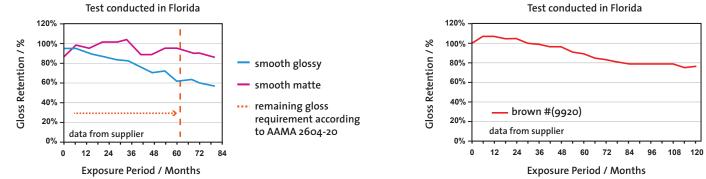

<sup>3</sup>AAMA 2604 compliance is dependent upon the color and/or effect.

 $<sup>^{\</sup>scriptscriptstyle 1}\mathsf{AAMA}$  2605 compliance is dependent upon the color and/or effect.

## Weather resistance of TIGER Drylac® Architectural Powder Coatings

Weather resistance testing according to AAMA 2605-20

TIGER Drylac<sup>®</sup> offers a variety of standard architectural products listed in the chart below.

#### **Custom Colors**

TIGER Drylac<sup>®</sup> offers custom color matching<sup>\*</sup> with as little as 88lb/40kg for solid and 396lb/180kg for metallic<sup>\*\*</sup>.

\* Series 75 colors marked with this symbol and those lighter than RAL 7000 in hue may prematurely chalk in extreme conditions due to the limitations of white pigment titanium dioxide. \* Due to the extreme durability requirements, organic pigments as a class cannot be used. This limits the colors to earth tone colors and colors of similar chromaticity in other parts of the spectrum, such as red, blue and green. Evaluations by our laboratory on a case-by-case basis are necessary.

\*\* Metallic colors and effect may vary due to the product chemistry therefore a sample panel should be requested for official color approval. Custom matching is available. Please contact your TIGER Sales Representative for additional details.
