Flat matte aesthetics for all latitudes

It is the first impression of a building and visible expression of innovative architecture: the facade. Tasteful, functional and in a variety of eloquent shapes, the building's envelope represents a face that is unmistakable.

Climate change, increasing UV exposure and the stringent quality requirements for coating materials according to QUALICOAT are turning facade coatings into a vital discipline worldwide.

TIGER Drylac® Series 68 Flat Matte ensures architects, designers and builders compliance with this quality standard. The product's design is highly weather-resistant, free of special labeling and it impresses with a velvety touch: for unique buildings around the globe.

Facade & Architectural Design
